

INSTRUCTION MANUAL air cooler

HACT-2601

Please read the instructions first before using the machine
Keep this manual for future reference

TIMER:

Press this button to set the turn-off time for the unit.
The turn-off time can be set in an hour increments from 1 to 8 hours. there are 4 indicators 1H, 2H, 3H and 8H.

MODE:

There are three selectable modes, the corresponding indicator turns on.
Normal mode: The fan operates in the constant speed set using the SPEED button.
Natural mode: The unit simulates a natural breeze.
Sleep mode: The unit simulates a gentle breeze suitable for night-time use

SWING:

Press this button to start or stop louvers oscillation from left to right. the corresponding indicator turns on.

COOL:

Press this button for a cool breeze when water is added to the water tank. the corresponding indicator turns on press again to turn off the cool breeze.

REMOTE CONTROL:

1. Please remove the plastic tab before first use. Must ensure that the remote control infrared beam is aimed at the unit receiver
2. remote using range:
 - ① within 5 meters away from the unit
 - ② within the scope of 30 degree from the unit
3. please keep remote away the sunshine, so as not to affect of the receiver
4. please take out the battery when not in use

Remote control replace

1. open battery cover
2. remove and replace the new one. pls note battery positive and negative
3. reset the battery cover

Functional characteristics

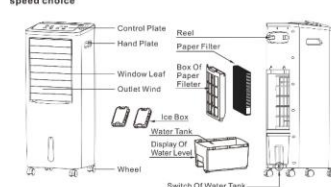

Increase air humidity, youth beauty: winter air temperature is low, the skin water evaporates too quickly, lips and skin easily become rough, cracking. The air humidifying technology adopted in this machine can rapidly improve the relative humidity of air and prevent the skin from cracking

Strong water pump, distributed spray technology, more uniform humidification: a unique water pump to drive the water cycle, and the use of decentralized spray technology to bring water into the filter core, so that more uniform humidification. **Removable paper curtain, easy to clean:** removable paper curtain, brush directly with a soft brush clean

Physical energy storage refrigeration, electricity saving, high efficiency and environmental protection: ice crystal energy storage refrigeration, ice crystal energy storage, long release time, can be used again and again for a long time, to help blow out the cool cold air. And the total output power of 200W, 1/20 is the general air-conditioning power consumption, this product is environmentally friendly home appliances, fluorine free pollution.

120° degree wide-angle air supply: wide angle air supply, and set low wind, mid wind, high wind, three block wind

Safety Rules

1. Non full-time personnel or unauthorized repair personnel may not repair or transform the machine.
2. It is strictly prohibited to operate with wet hands so as to avoid electric shock
3. Power cord aging, tying, plug damage should immediately stop using, and must be professional manufacturers or qualified full-time personnel to repair it.
4. Do not live cleaning, maintenance and movement of the machine.
5. If not use the machine for a long time, please unplug the power plug
6. Please do not insert foreign into or out of the air because there is a high speed rotating wheel in the machine to prevent accidental damage or damage the machine
7. It is strictly forbidden to use the machine in flammable and explosive gas environment and avoid long-term exposure to sunlight.
8. Please do not place the machine in tilt or other unbalanced places so as to avoid machine falling and damage to the machine.
9. Do not use outdoors.
10. The water level of the water tank shall not exceed the "MAX" scale at any time. When it is wet, the total water level of the water tank shall not be lower than the "MIN" scale.
11. Do not tilt or crash when placing the water inside the tank. When moving the machine, please push it slowly from side to side so as to avoid spilling water.
12. No tipping is allowed on this machine to prevent accidents. If the machine is not careful dumping, and the machine has water, should immediately unplug the power plug, and so dry after the boot
13. Please do not put items on the machine, prohibit covering the air outlet.
14. Cleaning the machine appearance, use wet cloth to scrub, do not use a corrosive cleaning agent. Do not use water wash the machine.
15. Do not put the air inlet and outlet of the machine close to the wall or other objects, otherwise it may clog the air flow and affect the air supply effect.
16. When the machine is in use, do not knock on the fuselage, or it may cause automatic stop.
17. The temperature range is 5-43 degrees Celsius. The water in the water tank is easy to deteriorate and produce peculiar smell. Please pay attention to changing the water, and use the humidifier in winter. If the indoor temperature is lower than zero, it is best to use warm water to damp.
18. Do not place the machine directly on the power outlet.
19. No use of this machine in the bath, shower head or swimming pool
20. No water is not allowed to open humidification function to avoid water pump burn out.
21. Ice crystal powder in ice crystal box prohibits children from playing and avoiding careless use.
22. When the machine is working, it is forbidden to touch or insert other objects into the air outlet so as to avoid accidents.
23. Product maintenance must be performed at the designated service point.

Working principle

Humidification principle: the use of the pump to pump water to the water tank, water curtain with paper flow down by the wind wheel motor drive internal wind wheel to a certain humidity paper curtain has around air blowing, water evaporation, so as to reduce the temperature and humidification function.

Function Keys Use Diagram

Cleaning and maintenance

Warm Tip: After a long period of operation, the filter and paper curtain due to dust and other dirt blockage affect the amount of air and dust effect, recommended according to the actual situation once a week cleaning.

1. Clean the air filter Unplug the power plug, hold the air filter handle up, you can remove the air filter, brush directly with a soft brush air filter, washed with water and dried, and then back to the machine.
2. Clean the paper curtain Unplug the power plug, first remove the air filter, then remove the paper curtain, the paper curtain from the paper curtain remove the brush directly with a soft brush to clean the paper curtain, and rinse with water, and then loaded back to the machine.
3. Clean the water tank Unplug the power plug, first out of the water tank, with a little brush to clean the water tank to clean the scale, and then rinse with water, and then push the water tank (Note: the bottom of the tank there is a water plug, the sewage can be released).
4. Wash the shell with a mild detergent and soft cloth cleaning.

Note: because the machine has high pressure, cleaning must be unplugged power plug, power operation Chassis assembly any part of the control panel can not be water.

Packing List

Serial No.	Name	Quantity
1	Aircooler	1
2	Icebox	2
3	Manual	1
4	Wheel	4
5	Wrench	1

Technical Parameter

Model	QCAC-15R
Rated Voltage	220V-50Hz
Rated Power	200W
Noise	≤76dB
Rated Air Volume	780m ³ /h
Rated Evaporation Capacity	950mL/h
N.W	12.0kg
Product Size	395x325x1000mm

Installation And Use

1. Open the package and take out the cooling fan and place it on the horizontal floor
2. Check the parts in the packing box conform to the packing list in the instruction or not. Note: The ice box, casters and wrench accessories are placed in the bottom of the box.
3. Install the caster: the machine in the flat on the ground (preferably with a soft cloth to do the mat). To prevent the machine headDepartment of scratches; out with a brake wheel 2 without brake caster 2, with a special wrench will not brake the caster into the frontFace, will be with a brake wheel into the back.
4. Add water:

The tank out of the fuselage, then add clean tap water.
Note: ① When adding water, please pay attention to the "water level display" on the tank, the water level of the tank can not exceed "MAX"(Highest) indicates the scale. Humidification, the water tank should control the total water level can not be less than "MIN"(minimum)indicating scale.

②If you want to strengthen the cooling effect, the ice can be frozen or frozen crystal box (filled with water) on the body inside the tank. (Note: This product is anhydrous ice crystal, add water, please note that the maximum water level warning ice crystal box

5. Insert the cold fan power plug into the power outlet, and ensure that the contact is good; press the control panel on the "Fire BT" button, you can run the cold fan.
CAUTION: Do not plug the plug with wet hands to avoid electric shock.

Function Key Use Method

Tips: Before starting the pendulum must be manually open

Control Panel Introduction:
ON/OFF: Press the ON/OFF button to turn on the unit. The unit starts working in mediumspeed and switches to low speed after 3 seconds when the unit is working, press the ON/OFF button again to switch it back to off mode.

SPEED: Press the SPEED button to adjust the speed. There are three positions - Low, Medium or High. The corresponding indicator turns on.
