! Precautions

- A standard power socket must be used, and it must be used separately from other electrical appliances.
- Make sure that the power supply voltage used is consistent with the rated voltage marked on this product.
- Never leave the product when it is started, and turn off the power switch even if the product is only put down for a while.
- After use, the plug must be unplugged from the socket. When pulling out the plug, you must hold the plug and pull it out from the socket.
- In order to increase protection, it is recommended to install a residual current device (RCD) with a rated residual working current not exceeding 30mA in the electrical circuit of the bathroom power supply. Please consult the (RCD) installer.
- If the product's power cord is damaged or other malfunctions occur, in order to avoid danger, it must be replaced by professionals from the manufacturer, its maintenance department or similar departments. Unauthorized disassembly is strictly prohibited.
- Do not use the product with wet hands.
- Do not place or store the product near a sink, water or other places filled with liquids and high humidity.
