

HomeElectric

OPERATION INSTRUCTION

1. Put the plug in a socket and switch the power on. After three to five minutes, you can begin to have your hair straightened. This product can reach suitable temperature in a short time and keep constant temperature, which is good for straightening hair.
2. After using, turn off power and remove the plug off the socket. Put it into the box only after it has been fully cooled.

Please Follow the Following Safety Instruction:

1. Don't cover the plates with anything in order not to destroy the circuit board.
2. Don't use it in a bath or place it where there is water.
3. Don't leave it in water or other kinds of liquid to avoid electrical shock.
4. To avoid being burnt, don't put the heating board close at your skin.
5. Children should be watched over by an adult when using it.
6. Keep the power cord away from hot materials.
7. Don't put the power cord around the plates when storing.
8. Don't use it when the power cord is damaged. To get it fixed, please send it to professionals or mail it to our factory.

**Please read carefully the operation instruction
before using to ensure your safety**
