| <p>Icon and real time temperature will show on the LCD display<br/>( turn the knob , three preset temperature 80℃/90℃/100℃ is available for your choice )</p> <p><b>Temperature set button :</b> turn the knob when under ℃ mode , the set temperature is every 8 ℃ on each level ( 80℃ indicates , adjuster counter-clockwise)the adjust range 80℃~100℃ . When under ℉ mode (clock clockwise, adjuster counter-clockwise)the adjust range 180℉~212 ℉</p> <p>①The standby state lasts 5 minutes , the kettle automatically turns off , the LCD display and all lights are off . At this time ,press any button or rotate the knob to restore the product to the standby state .</p> <p>②When dry boil happen to the kettle , it will stop heating and enter standby state .</p> <p>③Power function : If the kettle is lifted when the electric kettle is working and put back within 10 minutes to continue the working state ; if it is put back after 10 minutes , it enter the power-on state automatically . The setting light of the On/Off/Enter button will keep on , but the setting light of the LED screen and other buttons will be off.</p> <p><b>How to use for your kettle</b></p> <p>Wipe the exterior of the kettle with a soft damp cloth or sponge . Remove stubborn spots with a cloth moistened with mild liquid detergent . Do not use abrasive scouring pads or powders .<br/>Never immerse the kettle in water or other liquids .</p> <p>From one kitchen - depended on the nature of your water supply, etched scale deposit is naturally formed and can be fundamentally adhered to the heating elements , thus reducing the heating efficiency . The amount of etched scale deposited and subsequently the scale film on heating largely depends on the water hardness in your area (the frequency with which the kettle is used).</p> <p>Bottled water is not harmful to your health . But if poured into your beverage , it can give a speedy taste to your drink . Therefore , the kettle should be discarded periodically and used again .</p> <p><b>Cleaning:</b></p> <p>Under normal use , it is generally necessary to clean and descale at least twice a year; the specific method is as follows .</p> <ol style="list-style-type: none"> <li>1. Mix daily vinegar with water in a ratio of 1:2, fill the kettle (the highest water level) to start boiling water and wait for the kettle to boil</li> <li>2. Leave the mixture for 12 hours</li> <li>3. Pour off the mixture</li> <li>4. Fill clean water to the highest water level and restart the boil function</li> </ol> | <p>5. Pour off the boiling water. The scale and moisture have been removed and the cleaning of the kettle is completed.</p> <p>Electric data: AC220-240V 50-60Hz 900-1100W 1.0L</p> |
